

The Forestry Safety Association of Newfoundland and Labrador (FSANL)

Now offering On Site Occupational Hearing Testing

And

The 3M™ FT-30 Qualitative Fit Test

Sending your staff to local audiology or occupational health clinics for their baseline/annual hearing test can be expensive, not to mention disruptive for both the employee and the employer.

- Paying clinic testing fee.
- Clinic hours will dictate when employees can be tested.
- Paid time away from work while employees visit the clinic.
- Cost of a second employee to cover that shift.
- Cost of transportation or parking expenses.

*** While cost add up, productivity is being impacted.**

The audiometry equipment FSANL purchased for Occupational Hearing Testing, has been clinically validated to produce diagnostic test results and the equipment meets the audiometric specifications for occupational testing of ANSI/ASA S3.6-2018.

With this system, all records are digital and stored in a secure web portal. Historical data - whether from previous service providers, audiometric data storage software, or the local clinic - can be transferred to our digital system. A paper copy will also be provided.

For more information please call our office: 709-388-0374 or email: admin@fsanl.ca

Our staff is also certified to perform - The 3M™ FT-30 Qualitative Fit Test Apparatus (Bitter) that meets the performance criteria for fit testing respirators under the OSHA Standard for Respiratory Protection: 29CFR 1910.134
