

Emergency Safety Hammer

Its great to have an emergency safety hammer in your vehicle. It is designed to help prevent automobile entrapment after an accident.

Hammer:

Double-sided steel head to shatter window.

Seat Belt Cutter:

Helps you escape by cutting jammed seat belts.

How to use:

1. Use the seat belt cutter to cut the seat belt.
2. Once free, use the hammer to break your window.
 - Tip: Use the hammer at the top of the window to prevent glass from falling on you.
 - Both sides can be used, but the pointy side is more effective.
